Thermo Fisher Scientific Inc. (NYSE: TMO) is the world leader in serving science, with revenues of $17 billion and 50,000 employees in 50 countries. Our mission is to enable our customers to make the world healthier, cleaner and safer.

Dionex Softron GmbH is part of Thermo Fisher Scientific. We develop and produce products for liquid chromatography, as well as data systems for instrument control, data acquisition and evaluation, and data reporting. Located in Germering, Germany, Dionex Softron is a fast-growing and innovative research and development site. Over the past 10 years, the number of our staff has tripled and includes many mathematicians, physicists, chemists, engineers and computer scientists. All our employees contribute to our company's success and growth.

Finance Business Intelligence Internship

The internship position is within the Financial Planning and Analysis (FP&A) Department of a strategic business unit in Thermo Fisher Scientific. The intern will be primarily working on improving & maintaining the existing business intelligence solution. More specifically there will be a fully empowered member of the FP&A team with regards to the accurate and efficient reporting of many layers of data. In that relation, the intern will be providing qualitative and quantitative information to senior management and the rest of the organization in the form of dashboards, reports and will participate in meetings with the senior site leadership including the VP/OM and Finance Director of the business. This is an excellent opportunity to gain working experience in a global environment, covering different FP&A processes across the liquid chromatography product line in Thermo Fisher Scientific.

Roles & responsibilities:
- Support the FP&A team in improving the design of various KPIs and dashboards – for driving the right decisions at the right time, participate in reviews with stakeholders (including Senior Management) to translate business requirements into IT spaces and a project management process timeline.
- Work on the data collection/normalization and participate in the code reviews to optimize the business intelligence design/solution – in close partnership with the IT team & FP&A Manager.
- Continuously improve quality based on user experience and analytical capabilities, support in issues troubleshooting; contribute to the integrity of data and information in reporting and analytical solutions.
- Help the FP&A team with the automation of manual or sub-optimal business processes and analysis.
- Support the FP&A team with regular tasks, ad hoc requests and simplification projects.

Your background:
- Undergraduate student requiring internship according to his/her university curriculum.
- Advanced command of MS Excel and database (MS Access/SQL), knowledge of MS Navision and SAP is a plus.
- Bachelor degree course in Math, Finance, Computer Science, Engineering preferred.
- Data mining, data science (modeling), BI experience is a plus.
- Strong analytical and problem-solving skills.
- Process driven thinking and passion for simplification.
- Self-starter, independent with strong intellectual curiosity.
- Hands-on mentality.
- Good command of English.
- German work permit.

We offer:
- Internship with an innovative, growth-oriented organization.
- Balanced scope with both routine and project activities.
- Responsibility for own area including presentation of outcomes.
- Intensive coaching and feedback culture.
- Exposure to senior leadership team.
- Outstanding career and development prospects.
- Exciting company culture which stands for integrity, intensity, involvement and innovation.
